WHY RENT EASE?

Because...

- We consider “Safety” as our top priority of human assets
- The equipment is equipped with comprehensive safety features
- We have pan India presence and expanding into international markets
- Wide variety of equipment to satisfy customer’s need
- We provide on-site and off-site training to our customers
- We provide need based solution that best fits customers requirements
- We are focussed to provide maximum uptime for speedier implementation of customers’ projects
- We give quick response and timely solution

CUSTOMER'S BENEFIT

- Avoids huge capital investments for occasionally required equipment
- Reduced long term operative and maintenance expenses
- No transportation and storage cost for costly equipment
- Save taxes – Rental charges are debited directly to P&L A/c
- Avoid long term repayment commitment and maintain strong borrowing power for your core business
- Avoid regular compliances and emission standard
- Avail latest technology equipment can benefit business by bringing efficiency and specialization
- Avail benefits of expertise
- No borrowing cost for purchase of costly capital equipment

EQUIPMENTS – SCISSOR LIFT

Powered by Diesel

Scissor Lifts can be raised vertically only. Designed to provide larger platform work area & safe load upto 1 Ton.

Powered by Battery

- Suitable for rough terrain
- Self propelled driven around the site
- Operator on the elevated work platform can also self propel

Lift Type	Power	WH(m)
Scissor	Diesel	14 – 26
Scissor	Electric	05 - 17

WH(m) – Working Height in Meters

- Suitable for indoors & sensitive movement
- Suitable for maintenance & cleaning purpose
- Compact, light weight & easy to maneuver

EQUIPMENTS – BOOM LIFT

Powered by Diesel

Boom Lifts can be raised vertically, moved side to side and offer additional benefit of horizontal reach

Powered by Battery

Lift Type	Power	WH(m)
Boom	Diesel	16 - 48
Boom	Electric	12 - 20

WH(m) – Working Height in Meters

- Suitable for rough terrain
- Self propelled driven around the site
- Operator on the elevated work platform can also self propel

- Suitable for indoors & sensitive movement
- Suitable for maintenance & cleaning purpose
- Compact, light weight & easy to maneuver

EQUIPMENTS – NIFTYLIFT

- **Niftylift** has appointed RentEase International as its distributor for India.
- RentEase will sell and service Niftylift boom lifts throughout the country
- Niftylift machines offer significant advantages due to their compact dimensions, low weight and environmentally conscious hybrid and zero emission machines.
- Compact and low weight chassis' and all are easy to use and simple to maintain.
- Versatile power options such as mains, battery, petrol, diesel, LPG and even Hybrid provide flexibility and increase utilization, while integrated safety features maximize operator safety.
- Working heights ranging from 9m (30ft) to over 21m (69ft)

EQUIPMENTS – EASYLIFT

- **Esylift** has appointed RentEase International as its distributor for India.
- All models are equipped with a **hydraulic drive with rubber tracks** allowing them to easily work on uneven surfaces; despite the low centre of gravity for the most demanding client extending tracks are also available.
- Most models are with a radio control allowing a different use of the platform; the highly proportional movements and speed can be adjusted as required.
- Some models have reduced size with variable configuration and automatic leveling, making them ideal for working in small spaces old town centers, indoor and residential areas.
- Environ friendly to keep air and noise pollution to a minimum.

EQUIPMENTS – SCANCLIMBER

- The products can deliver based on their wide applications across the construction value chain that include, construction of high rise residential and commercial buildings, aluminium and glass claddings, external brick works, external plastering and delicate material handling.
- Construction of chimneys and cooling towers of thermal power plants, steel plants, refineries and ship maintenance in shipyards and port are the other areas for mast climbers and suspended platforms applications.
- Maintenance, replacement and dismantling of chimneys, cooling towers of refineries, chemical plants etc.

EQUIPMENTS – GLASS MANIPULATOR

Powered by Battery

A revolutionary new way of installing glass/ windows. The elements upto 1 Ton can be lifted.

Powered by Battery

- Suitable for installation of glass windows
- Suitable for movement of glass and marbles
- Compact, light weight & easy to maneuver

Product	Power	SWL(kg)
RE GM 350	Electric	350
RE GM 575	Electric	575
RE GM 600	Electric	600
RE GM 785	Electric	785
RE GM 1000	Electric	1000

- Improves health, safety and efficiency at work
- Reduces material handling damages
- Reduce manpower cost & interference at work

“Leading the Aerial Platform Association of India as President”

Mr. Meghraj Singh
Co-founder & MD

“Strict Legislations needed to ensure safety of workers who work at heights: APAOI President”

Taking safety of workers as priority, the newly elected President of Aerial Work Platform Association of India (APAOI), **Mr. Meghraj Singh** has called for strict legislation to ensure safety of workers who work at height.

He said, “Though the government of India has proactively brought in constructive & business friendly policy reforms that will propel the growth across the infrastructure sector, which is the backbone of economic growth of the country, however, in the line with labour law reforms, strict legislation on working safely at heights is also required.”

Meghraj Singh was speaking at the third annual general meeting of the organization held recently in Mumbai. He updated that APAOI has joined hands with IESC (Infrastructure Equipment Skill Council) to raise the issues hindering the growth of the industry and create awareness among the industry players for sustainable growth.

“Government of India should take serious steps to support Indian manufacturers”, he added.
